CIPS CERTIFIED — HUMANITARIAN PROCUREMENT PROFESSIONAL (LEVEL 3, 2025) · LANGUAGES: ENGLISH / BAHASA MALAYSIA / IBAN

01 / PROFILE

I design and build the systems a business runs on. At a working veterinary hospital, I took a paper-based procurement and inventory operation and replaced it with web applications I designed, built, and deployed myself — then measured the result: **76.5% less manual paperwork, 90% automated ordering accuracy, 71% fewer critical stock incidents**. I work from the problem down: map the workflow, model the data, build the tool, watch the metrics, refine.

02 / SYSTEMS DESIGNED & BUILT

PIMS — Procurement & Inventory Management System · PRODUCTION · LIVE

pims.wasabietech.com

INVENTORY · ALERTING · LIVE DATA · VET CLINIC OPS

Centralized system replacing legacy paper workflows for procurement, inventory, and stock control at a veterinary hospital.

- Designed the data model around the real workflow: PRFs, POs, GRNs, stock movement, expiry and critical-item tracking.
- Built digital tracking modules that raised stock-checking efficiency 50%.
- 71% fewer critical stock incidents (310 → 90)** after replacing paper stock checks with system-tracked counts.
- Auto Pilot ordering module: **90% accuracy** on pharmacy requirement ordering, cutting manual workload for operations.
- Impact: 76.5% reduction** in manual PRF creation within 3 months of launch.

MAP — My Awesome App · ANDROID · PERSONAL USE

github.com/H4fizWasabie/map-android

KOTLIN · ANDROID · LOCAL-FIRST

Native Android app I use daily for task scheduling, calendar planning, documents, scanning to PDF, and local music.

- Brings Home/Today, Tasks, Calendar, and Tools into one personal utility app.
- Uses Room/SQLite for local state; works offline without an account, backend, analytics, or cloud sync.

Procura · PRODUCTION · LIVE

procura.wasabietech.com

GO · REPORTING · PRODUCT & SUPPLIER INTELLIGENCE

Turns product, supplier, and purchasing information into a connected workflow for sourcing decisions.

- Consolidated **73 → 25 active suppliers (65% reduction)** using spend analysis run through the system.
- Converted key suppliers from pay-in-advance to credit terms — negotiated from data the system surfaced.
- Standardized SRM protocols and supplier KPI tracking for reliable delivery on critical medical supplies.

Theoses — Personal AI Operating System · ALWAYS ON · SELF-HOSTED

github.com/H4fizWasabie/theoses2

AI AGENTS · AUTOMATION · VPS

Self-hosted AI agent handling research, planning, content drafts, repeatable workflows, documentation, and daily digital operations. The system behind this portfolio.

03 / EXPERIENCE

Procurement Officer — Starlight Veterinary Medical Centre, Ampang

DEC 2025 – PRESENT

Owner of the full procurement-to-inventory operation; designed and shipped PIMS and Procura above. Digitized the entire procurement lifecycle; negotiated payment terms; run supplier consolidation and KPI programs.

Procurement / Operations Officer — IMARET (IMAM Response & Relief Team), Selayang

DEC 2022 – DEC 2025

Humanitarian procurement for clinics and field projects. Designed a Procurement Cycle System adopted as the organization's SOP. Built periodic reporting on inventory usage, assets, and projections for management decisions. Maintained 100% PRF/PO compliance across medicine stock and asset management for 2 static clinics + field missions.

Assistant Pharmacist — Big Pharmacy Healthcare, Kuala Lumpur

DEC 2021 – NOV 2022

Stock intake, inventory control, controlled-drug (Poisons Act 1952) handling, audits, daily reconciliation.

Earlier roles

2012 – 2021

Flavorist, Raw Factory Flavour (2019–2021) — inventory of new product lines; member of a government hand-sanitizer production contract during MCO. **Medical Assistant, Ministry of Health Malaysia (2012–2015)** — emergency and trauma care, triage, ambulance coordination; certified Advanced CPR.

04 / SKILLS

SYSTEMS Workflow design · Data modeling · Requirements → build → measure loop · Automation

TECHNICAL Go · JavaScript/React · Self-hosting (VPS, Caddy) · AutoCount (trained, incl. e-invoicing) · Excel · Data visualization · AI-assisted development

DOMAIN Procurement & sourcing · Inventory management · SRM · Supplier negotiation · Healthcare operations
